african studies as a field of inquiry has had to combat the  
insidious interpretations of racist theories used to justify the  
domination and colonisation of the continent for the past five  
hundred years while this has not been the complete history of the  
field it has yielded numerous historians who have either  
misunderstood or deliberately distorted the idea of african agency  
now jacob gordon has brought together some of the finest minds in  
the field to establish the parameters for the future there have  
been two general movements in the past one hundred years that have  
reflected the ideas of africans toward the doctrine of white  
supremacy in african studies and other fields negritude and  
afrocentricity both of these movements have attendants variances  
and oppositions nevertheless they may be said to speak to the same  
problem confronting the african people in a global way and african  
studies specifically this book represents an advance in the  
conceptualisation of african leadership and political direction  
there have always been models of leadership rooted deeply in the  
culture responsive to the historical contexts of the people  
themselves that have been used by african leaders however what the  
authors in this volume are committed to is the development of ideas  
and ideals that will lend continuity to the best traditions of the  
african people
